### ORIGINAL POETRY.

How deceiving is earth ! With a soreerer's art, She chains us to pleasures of sense : White her glory and mirth, Real joy ne'er impart, Nor furnish from pain a defence.

How unhappy man's state! Her false tales he allows, On her visions he fixes his heart : She'll be burnt in the close,

Oh! then let my soul gain The rich pleasures of heaven, Where all is unchang'ably true; Where there's nothing to pain, But where glory is given To all to whom glory is due. Philadelphia.

PRAYER FOR GREECE. Look down illustrious souls, look down, And say to Greece be free ; Look from empyrean fields, and frown On Turkish tyranny; Shake heav'n's high halls with dreadful ire, Send thunder from the skies, Wrap Moslem tow're in daming fire, Till the strong demon dies.

Great spirits of the fallen brave Tread now thy classic shore, The sun of Greece in freedom's grave, Her lamp of learning, once so bright, That lit a hundred hills, Hath long since set in endless night, Dark woe her bosom fills.

Her halls, where once sweet rapture rung, No sounding lyre now sighs; But where was heard the trumpet tougue, Are heard but shricks and cries; And there the crimson erescent wavet, Where once the Lyceum stood, The cross in human gore still laves, The moon doth blush in blood-

Look down, immortal Thunderer, look On Homer's happy land, Thou who the heav'ns and earth bath shook, Preserve the brilliant band; and from her dungeon drag once more, The genius of the brave, Then Greece shall dig, in human gore,

## THE GAMBLER'S WIFE.

I saw a maiden with an eye as bright Assum-beams, playing on the fitful stream, And knew therefrom there was a holy light, As pure, and soft, as Cynthia's silv'ry beam-And it has whirl'd my fancy in a dream, To see her form majestically move, And as it mov'd to me would almost seem like some fair spirit from the realms above, loth'd in immertal charms to move the soul to lo

Again I saw her-not the sprightly one Whose looks bespoke a heart and mind at rest; No more she dazzled as the mid-day sun. And gave to all around a richer zest-She was a wife-(alas! a wife unblest,) Of one who knew not-cared not what He was possess'd of; one who sought that nest Of men where on a throw hongs destinies, While their hearts wildly pant, and frightful roll their eyes.

Whose nightly hours were spent in revelry, Nor his poor wife would be e'en look upon, But from her presence, like a viper, flee; ould but gently shide him-he Would basely strike that tender, loving wife, Then seek his mates ; -and in "ungodly glee" Profane the night; or, in some brutal strife, Think not, fast from its sources ebbed away her life

And could she bear such treatment? no; her heart rell'd now with many an agonizing pain, And when she'd think of former joys, the smart Ah! sad is now you melancholy strain! That sunken cheek, and lightless looking eye Too plainly spoke, no more she'd sigh again, But wing her passage to the realms on high And join the blissful choir, in endless minstrelsy. CIREX. LANGLAND'S BARON OF WILTON.

An adventure of no ordinary description is related of one of the ancestors of this feudal thief. In the dark ages ere John Knoz had promulgated his doctrines of reform, which exertines the power and mammery of the Roman priesthood in Scotland, the laired of the Barony of Willow, wend to be exercised. ony of Wilton, went to loggerheads

of Baron's lands paid tithe to the Abbacy of Melrose. An account of this kind had been due by his honor for some time, which he refused to pay, on the plea of an overcharge; and at length a monk was despatched from Melrose to wait upon him, and get matters settled without further delay. The electical messenger on the morning after he had reached flawick, was taking a walk previous to calling at the Mansion house; and about a mile from the town, near Heap, met the refractory doctor of the chemback. The Baron's lands paid tithe to the Abbacy ing at the Mansion house; and about a mile from the town, near Heap, met the refractory doctor of the church. The Baron was not unknown to the priest, and the latter "doffed his cowh." Unancustomed to meet a clergyman at so early an hour, Langlands halted, and on the common frivolties at meeting offered and received, he seemed disposed to talk. The monk took this opportunity of making him acquainted with the object of his mission.

mission.

The llaron knit his brows, and looked down, while the churchman having committed himself, proceeded. Though the passions of the Baron were gathering into wrain, yet he was able to suppress them for a time, and the priest went on. His honor had been repeatedly dunned for this arrear of tithes, part of which he conceived to be a villainous charge; and at length in a stern tone, stopped the monk by exclaiming, who, and what are you, sie? The clergyman assumed his dignity in turn, and replied "I am a son of the church, commissioned to demand a debt due to her by turn, and replied "I am a son of the church, commissioned to demand a debt due to her by the Baron of Wilton." "You may be the son of perdition for any thing I know," rejoined the angry Baron, and walked away.—Things having come to this crisis, the descendant of Melchisedeck was not to be easily defeated: he dogged Langlands for a few yards, and reiterated his claim. The representative of the successor of St.

his personal safety secure in the sacredness of
his office, he mustered a goodly share of courage, and placing hissoff on the Baren's front,
said, "I am the Abbot of Meirose, himself,

I must inform you in the name of the church, I must inform you, that it will be well for the barony of Wilton if tithes due on the estate are pard to me before I leave Harwick." His feudal lordship, fore I leave Harwick." His feudal fordship, who perhaps had never been so bearied in his life, in a momentary paroxysm of roge drew his heavy two-han-led sword from its scab-bard, and had the unfortunate Abbot at his feet, 'shorter by the head.'

Langlands walked moodily homewards :and, before he entered the cateway of his cas-tle, he had become sensible of the perilous plight in which his rash action had plue of him. He had done the deed, however, and how was the fatal error of a frantic moment to

While the priesthood were preparing to hanch their fiery anathemas against Langlands, he was busied in intercessions at Court for means to ward off his impending fate.—Douglas of Drumlanrig and Harwick was at that time a favorite with the King, as well as on friendly terms with his neighbor baron.—The latter communicated to his fire ad the insult he had offered to the courch, at the same time concealing the death of the Abbot, but time concealing the death of the Abbot, but urging him to use his influence with the King to procure a pardon without delay; seeing, power of the church was combated, perhaps the Sovereign might heaitate to interpose his authority. Dramlanging accordingly procured an audience of the Monarch. His Majesty was in high humon and spirits when he received the two T-viotdale Barons at Holyrood; and Drumlaurig pro-ceeded to business. "Please your Majesty, this is James Langlands of that ilk, and Baron sequences, and heretore prays most tuning that your Majesty will afford him protection, seeing that his enemies are both numerous and strong." The King having heard of the transaction in a former conference with Douglas, shook his head and smiled, "So you knocked off the bonnet of a dignitary of the church with your sword Langlands?" "I did in an unlucky moment, please your Majesty." "And you have thereby stirred up the evil spirit and power of the priesthood?" "It is even so my liege." "What had the Abbot done to provoke you?" "If was insolent and unreasonable in demanding payment of tithes, my sovereign." "And for the indignity offered to the clerical order you crave my protection from their wrath?" "Most humbly, please your Majesty." "I grant it freely," said the King, "and my friend Drumlanrig will see that the pardon is drawn out in prostatistics of the same character. The pardon which the offender had obtained on this occasion was equally calculated to starm and irritate the priesthood, and although siarm and irritate the priesthood, and although the momerch enjoyed the joke along with his courtiers, and felt no way disposed to resent the trick that had been played upon him, yot he so in began to discover that by particular, an act of such hostility to a powerful nody, bud placed himself rather in swkward orcamistances; but, fortunately for the credit of the Government, an accident came to the recollection of the King that seemed well suited for bying the ground work of a propitiatory offering to the dangerous grambling of the clergy. The Archb shop of St. Andrew's had for some time past pressed his Majesty reclergy. The Archb shop of St. Andrew's had for some time past pressed his Majesty repeatedly for an additional grant to the church though without effect; it now occurred to the King that the request of his Grace might be acceded to on condition that he ecclessatical murmuring throughout the kingdom on account of the Abbot's death should be silenced. The terms of reconciliation being propounded to the archbishop by royal authority, through the medium of Diuminney, an agreement was immediately made and a timekspying to God for a munificent Sovereign took piece of seditions wailing for the murdered monk.

LETTER FROM A NEW PRIEND. To the Editors of the haturday Evening Post.

To the Edisors of the naturally Evoning Poet.

I do not come from the Moon, nor Russia, nor New York; but I am a plain isrmer, coming now and then from my farm to pay a visit to my friends in Philadelphia. I was very much astonished to see not long ago, two columns of scurrility, nonsense and abuse in the Evening Post, about a paltry book, which I had got last week to arouse my children in the support of the property of the pr which I had got last week to amuse my children in the mirrery. 2.—You tell me strange things—I was not aware of this.

M.—It is a fact: you will find it out if you do not side with them in every thing. But let us come to the point. Show me how the monstare of the book are as you state?

2.—There they are—and here are the similar plates of Bewick and also the Dictionary of Britarial Mistory, whith could have been capied; but something new and winderful was to be done, and have in the result. New animals are disclaimed against, and we have huse a dutien of new fictitious mimals, such as never axisted. A Mink with a long tail like a Mat, while the true Mink has a shorter one, and a white begant benides. Here is a hrown flow with a heard under the chin. And here a loack Walf with ruffles sound the neck, or class a shaggy mose like a Lien; and so on! ggy mone like a Lion : and so on! is so indeed—This is the reseen the

B. O. harmothing to say for them. I confess I never saw any Raccom, Fez, and Skunk, like those in the Book.

Z.—It is easier to write nessense and call hard names, than to make an accurate book of Natural History, or to direct ignorant painters, when you are as ignorant as them. But in the art of Book making this is of little consequence: a fine appearance, a few nufficient

ers, when you are as ignorant as them. But, in the art of flook making this is of little consequence: a fine appearance, a few puffs by A. B. C. will carry one through: while a work of deep researches, long travels, socurate observations, may be neglected.

M.—Yea, thus B. O. has even puffed the honk, by telling us, how well it sells, and will sell in 160 years hence!

Z.—Just so: this follows of course—only tell that a hook sells, whether true or not, and it will help the sale. This discussion may even help it by causing an enquiry into the facts stated. And the author may thank me one day, when he is out of passion, for having noticed his flook, which was thought unworthy of notice by many. There is nothing more dreaded by a Book maker than sident contempt. I regret now that I did not size that respectful way—I have not alept less soundly for all that.

M.—Yeu are accused of not giving explicit. one that respectful way—I have not slept less soundly for all that.

Z .- I was only to give a sketch at first .-I meant in a subsequent number to have com-to details, and even given credit for some few to details, and even given credit for some few tolerable passages; but now they may sleep in peace, along with the stories of the far famed Munchausen and Pontopidan. By comparing the Book to Goldsmith and Bewick i did too much honor it. It is more like (by its fictions) the works printed 200 years ago, before Natural History was a science.—
In fact it appears that it is meant to make it go back, or rather change the Science into book making.

nock making.

M.—Dont you think the little was presump

tuous?

Z. — Certainly. It ought to have been called a Sketch of the Quadrupeds of the United States and the North Pole. It has no pretension to an American Natural History, unless the United States be the whole Continent.— Hesides, Birds, Fishes, Snakes, Plants and Minerals, are all included in Natural History,

yet they are not to be introduced here. A table title is a had omen.

M.—Fareweil—I am satisfied that B. O. wanted to puff the Book under the shape of a Walter to pure victicism was fair and not too severe. I mean to gratify him by publishing this conversation, as a new pull of another kind. Nothing like discussion and notoriety to help a bad book. I hope he will thank me in his next pull, instead of calling hard names, as he has done to you: which, by the way, is as he has done to you: which, by the way, is

The attention of the Public, particularly that of the amateurs in the Fine Arts, is called to a Mechal recently executed and published by Mr. M. Furst, of John Quincy Adams, President of the United States. Mr. Furst's eminence and excellence in his profession, as Engraver and the Sinker, has long been known to a portion of the American Public; he having, at different periods, executed, agreeably to vote of Congress, several homorary medals, for our victorious Officers: the Idams Medal is said to be at least an equal, if not a superior effort of his genius. Mr. F. not a superior effort of his genius. Mr. F. has again located himself in our city, having erected a handsome establishment in Chesnut the purposes of his profession, where we sin-cerely hope he will meet with support and encouragement commensurate with his talents and industry.

CONNUNICATION. CONMUNICATION.

I was induced by an advertisement of the swards of the Franklin Institute, to examine a Btove invented by Joseph Page, and made by John Harned, in Market near Tenth staget, (where it can be seen,) and do consider it the best constructed and useful article for culin ary purposes I ever saw, its oven surpasse: conception—and it is but justice to the inven-tor, the maker, and the public, that it should made known by every patron of the USEFUL ARTS.

About a quarter before ten o'clock last Monday night, a fire broke but in the bake house back of No. 91 South Wharves, below Pine street, which, with the store-house at-tached, was destroyed. The fire is said to Prine street, which, with the store-nouse at the have originated in accident. A boy who was employed in packing crackers in kegs, went to sleep, and the flames of the candle caught some combustibles in the room. The buildings were the property of Mr. Lewis Reinecke, and were not insured; there was an insurance on the stock, which belonged to Mr. Lord.—An accident occurred during the fire through the incatiousness of some of the persons who were engaged in emptying the store house of its contents. One of them threw a fifty-six weight from the second story, into the narrow alley adjoining, in which there were at the time a number of men and boys. It grazed the shoulder of a middle aged gentleman, and atrack a young man with so much force that he was carried away senseless.

A marble slab from Hunter's quarry, was brought in front of Congress Hall, Chesnut street, to be placed upon the steps in front of that extensive and beautiful building. The stone measured seventeen feet in length, eight feet in width, nine inches in thickness, and weighs eight tons. It will be covered by a handsome portico.

A female, the wife of a respectable weaver, in the vicinity of Centre Square, cut her throat on Wednesday morning. She descend-ed to the cellar to get some butter for breakfast, where she perpetrated the dreadful deed. A physician was immediately called in, but he entertained no hopes of her recovery, and she died shortly afterwards. The cause of this violent termination of life is said to have been constitutional melancholy.

GOLD MINES,—A letter from an intelligent cities un North Carolina to another in this city, under date of Salislury, Oct. 6, says.—The extent and value of the Gold mines are becoming every day more apparent. Of course some mines are larger than otters. The one at Chisholin's has been found to be rich for a quaster of a mile up the branch, and on each side from 10 to 20 yards.—There are many spots trons 10, 20 to 100 acres on which gold can be found, averaging isom half a grain to two grains of gold per bushed of carth. In most of these places it is not gold but water that is scarce. Gold has been found in the neighbourhood of Charlotte: those muses are rich, but their extent is not yet known. The gold found there is in very ino particles, embedded in forrugmone clay, running in veins. This is taken out, made fine, then washed down, and the gold annalgamated. Chisholin's gold mine is attnated two miles above the Nareowa of the Yadkin river, on Heaver dam Creek, abused one nide from its mouth. It is on this onion we are erecting our steam engines. If the machinery low working anower the purpose we cannot full to do a good bossness. The gold is there—all that we want in order to obtain it, is Indeer exting machinery. The trial of Feld rd, Jasob Barker and dropped into the Loke in 200 feet waters, indicated in New-York for a conspirate to defroud certain hanks and individuals, terminated on Thursday of last week, Judge Edwards delivered his charge to the jury on Friday morning. On Saturday morning, the jury made a communication to the court, that they had not agreed on a verdict, but wished to come into court. On their appearing in the jury box, it was stated by one of the panel that there was no possibility of their coming to an agreement, they therefore prayed to be discharged. Br. Coldon wished the court-of instruct the jury, that if they could agree in favor of any one of the defendants, they might bring a verdict of not guilty as to him. The district attorney denied that this could be legally done. The juror remarked that they could agree upon no one point; and mid he could assure the court on his bosor, that if they should sit a month there was an impossibility of their agreeing. Being asked if the court could give them any assistance which might remove the difficulty, he replied that he did not think they could.—The court said they could not, in the exercise of sound discretion, discharge the jury at present; and they returned to their room.

If the most precious cargo of the Indies, of pearls, and ingots of gold, were brought into this port, and proved to be American property, they should be held accred and restored. I was charmed with the urbanity and dignified manners of this Harbarous chief. These people are gradually abandoning their piratical pretensions. For instance, they have lately granted the coral fishery of this coast from Bona to Oran, to the Neapolitan government, on condition of receiving one half. This will employ numerous fishermen, and create a market. It is but a small step towards the pursuits of civilized society, but it is still something.

"Much of the occasional misery of the manufacturing poor in England arises from a rate of living and a mode of food, which, in no country in the world, can permanently be afforded to the great body of the people. The use of tea, and the use of malt liquors, are quite peculiar to the English poor, and while these habits continue, they must occasionally be subject to great distress."

Little does the intelligent London editor know of "the mode of food," which the great body of the American people enjoy, and are likely to possess for a very long time to come. Among us, those whom we denominate the poor, can, universally, obtain-tea and malt liquor, and other articles which they much prefer. #### The Drama.

It gives us pleasure to notice that Mr. COWELL takes a benefit at the Circus, this evening. The new comedy of Pat. Par is to be brought out. On such an occasion there need be no fear of intrusion if all Mr. C.'s

Our young townsman, E. Forrest, has recently fulfilled a short Theatrical engagement in Baltimore, and judging from the testimony of the public papers, and some private letters that we have seen, his success may be proounced quite complete. Mr. F. is, as we hear, engaged at the New Theatre in New-York, for the season, with an understanding that he shall occasionally visit the neighbor ing cities upon short engagements—a species of performing that will afford him opportunities of wholesome practice and tend to give him that degree of ease and confidence so essential in the higher walks of his professiona rank, which, if health and present excellent habits are continued, that he is certainly destined to fill. It is said that Mr. Forrest will appear occasionally before a Philadelphia auience during the winter. It will afford the public much gratification, and we doubt not, add to his prescut enviable fame—that is, his friends and the friends of the drama here, will never suffer him to lack patronage while he ontimes as now, deserving of their esteem

continues as now, deserving of their esteem and their approbation.

Mr. E. Forrest, while at Baltimore, performed several of the leading characters of the drama, and is each of them acquitted himself with the entire approbation of the auditors, which, on each occasion was highly fashionable and numarous. The papers severally contain the warmest eulogiums on his performances. At his benefit he personated the character of Damon, in the tragedy of Damon and Pythias, for the second time, it being entirely new to him, not having studied the part previous to his departure for that city. His spirited style of acting it elicited the most desfening applance, and at the conclusion of the play a vary general call was made for him—he appeared, and returned thanks for the very strong marks of approbation swanted to him by the crowded assembly which he had the honour to address. On a request from many voices for a new engagement, he assured them that his contract in New York readered it wholly out of his power to perform more than another evening, and that he left it to them to select the character; when the undicate generously referred it to himself. He appeared the nast evening as Octasias in the Mountainers.

Mr. Cooper appeared in the character of Mschoth at the Baltimore theatre, on Wedne-day evening last. This gentleman certainly goes to England.

Mr. Kean's health did not permit him to appear until after dianer.—" Mr. Kean's indisposition obliged him to retire twice or thrice in the evening, and he left the company early." He was metaphorically grandiloquous throughout, in his first speech. He discoursed of "the vill of prejudice, the gen of talent, the sea of troubles, the critic's lash, the caprice of fortune, the succedaneums, of intellect and deportment, the grand desideratum, bankruptey of gratitude, the spoils of war consecrated to Sophocles and Euripsdes," &c.—But we must give a compare my desolate heact in nothing else than an Alpine rock, frowning against, but over a herined by the lowering tempest; but the gloomy clouds have gradually dispersed, and the noble liberal citizens of Montreal displayed to me the dawning of the sum of spring, which gave new light and life to future prospects; but the summer of my hopes appears to have been preserved from the disperse that lifte me onesere to the summit of my wishes and ambition.—England, ever just when she considers, as taken in a proper view the injustice of my late persecutions, has peactrated into the machinations of my exemics, and invites my return with an enthusiasin greater than even was bestored on my humble taleats, on my has reactivated into the machinations of my ensemine, and invites my return with an enthusiasm greater than even was bestowed on my humble talents, on my inset acquaintance with a London audience. #### SUNDAY, A SABBATH.

We have before us at this moment an a count of the Sunday Schools in Albany in New York-by which, we perceive, that thirteen of those valuable institutions exist in that city, and two or three in its immediate vicinity, giving instruction to nearly two thousand children. With the general uses of Stinday Schools almost all our readers are acquainted, and very few have been found to oppose the formation of those seminaries of early piety. We have enjoyed opportunities of witnessin the effects of Subbath instruction upon children of both seace, and almost all ages, and can, of course, bear testimony to their value -We will not attempt to offer a single argu ment in favour of a mere observance of the Sabbath, upon scriptural, or religious grounds, because those who are sensible to religiou impressions are never unwilling to enter upon Sabbath exercises-but our opinions are (perhaps they may be traced rather to the mpression derived from religious instruction than from any abstract deductions of reason,) that the Sabbath, considered as a day of rest, and centation from secular duties, is most valuable in a moral and political point of view .-If there was no relaxation from the attention which business commands, those whose state in life requires a devotion to employment, would become weary of their vocation and of the unceasing round of labours and care, and would relax their exertions; or else they would, by continual applications, find their feelings indurated, and their appetite for social enjoyment so destroyed, that they would, by taste and habits, cease to form one of the by taste and habits, cease to form one of the social compact, and become insolated and lost. We propose pursuing this subject at a mor favorable opportunity.

A first annual Concert of Vocal and Instru mental Music, for the season, was given by the St. Cecilia Society, on Monday evening last, in the large room of the Masonic Hall. The previous arrangements of the Society did not admit of as much preparation as is customary for a public exhibition, yet, notwithstanding, the Vocal performers appeared to be in fine voice, and executed with pleasurable effect several favorité songs and glees. We regretted the want of the usual accompaniment of female voices-this, we understand, originated from indisposition and absence from the city of several of the ladies who had hitherto assisted and enriched the Concerts of the So ciety, by their powerful talents,' The Instrumental performances this evening, were equal in point of execution, to any that we have heard given by the Society. It is gratifying to learn that exertions are making to place the Society in a way to render their future public displays still more interesting to the amateurs and lovers of music than they have yet been. An election for officers takes place on Monday evening next, and as the resulting probably affect the future standing of the Society, a general and punctual attendance is particularly called for.

BONAPARTE'S GRAVE.

(From the Journal of a gentleman just re-irined from India.)—Our touching at 5t. He-ma would have been an incident devoid of therest to me, had it not been for the oppority of viewing the tumb of him whose de-tating arm spread terror man whose de-Europe. St. Helens appeared to be in itself to free to the state of the second to the -a scene of all others the most likely prison—a scene of all others the most likely to break the heart of one banished to its abrupt and ragged strand. It cost me a world of trouble and fatigue (which, but for the object I had in view, would have been ill repair) a mount aus the intern series in which it is not be in the properties windings. jett I had in view, would have been ill repaid to mount up the jeteep serperitine windings and constant twistings and turnings which relieve the traveller to a certain degree in the almost perpendicular ascent. On my way, I passed by the country-house called the Briars, which was the first habitation of Napoleon on his arrival in the island. It is a very sweet spot when contrasted with the surrounding housest of the bales. pot when contrasted with the surrounding orrors of the place, and owes much of it ttraction to a water fall, which invites to mus ag and meditation, but the haunts of the living were not the objects of my expedition and I at length gained the tomb.

He who looks for the lofty and sublime in he manaion of the dead, will be who ly distantiated i not a trophy, not a wrestly, no broaminted;

naion of the dead, win a substy to the control of the compet, nor fallen spear, no giave nor plain slab, formed of three Portugations, taken, for the purpose, from place of the Ka-Emperor's kitchen, in his new house, is the only covering on his grave; on this not a line either descriptive or commemorative, is written; no name, no date, as if he had gone—

"And, like the baseless fabric of a vision, Lest aut a wreak behind."

Around the seeluded spot, the romantic and picturesque prevail in a high degree. It is situated in a green valley, well planted with umbrageous trees and beautiful shrubs. Five umbrageous trees and beautiful shrubs. Five willows droop over the blank tablet, and, wasting in the breeze, throw alternate light and shade on this unlettered monument, rusting, at the same time is a mouroful cadence. On the left side of the grave are peach-trees, which bear fruit, and a spring, as bright as crystal, glides on the outside of the railing which is about the tomb, and itself encompassed by whedge of geraniums. A sergeant and a private are placed here on guard, and have orders to prevent people from gathering leaves, and cutting pieces off the willow trees. I had intended to write a line, by way of epihave orders to leaves, and cutting pieces off the winow re-leaves, and cutting pieces off the winow re-tall had intended to write a line, by way of epi taph, with my pencil, on the stone; but the taph, with my pencil, on the stone; but the taph, with my penci, on the stone; but the thing was impossible. My attempt was re-sisted, and I had some difficulty in obtaining a small piece of one of the trees; but was freely allowed to gather some of the peaches. reely allowed to gather some of the peaches and the geranium, the hue of which reminded me of the priban I of the Legion of Honor, founded by the deceased, and elevated by the blood of so many a battle-field. I now prepared to depart, when an incident of some interest arrested my steps for a while. A young and pretty French lady approached, and was seen beaung in a pensive attitude over the railing before described, with her eyes in tears, bent on the grave which it enclosed.—She was one of a party of natives of France, who hall landed from a ship in the bay to visit this memorable sepulchre. Her companions speedil arrived, and, after a look or two, personsied her to quit the spot to which she seemed almost immoveably stached. The only male in the party evinced that trivial discipant which signaluses the character of his countrymen. He surenged up his shoulders, which signalizes the character of his men. He suranged up his shoulders, they fell again, uttered something its of the southers and uncertainty of the southers and the southers of the southers and the southers of the southers of the southers of the southers are the southers of the sout human glory. Then (speaking of the island) human glory. Then (speaking of the island) human, Alls fis, c'est us each at executible. The young lady remained without speaking slit the time, and in a few minutes I host sight of her. I now regarded my ship, and made sail for Randand but the horse weekle

LUCKY AND UNLUCKY DAYS. Superstations are as old as the world, and is very probable they will end only with it amongst those that are to be traced to im Amongst those that she to be traced to me among the control of the ornal times, we must rank the opini

Nones.

It must, however, be acknowledged, that chance often vontributed to encourage such superstitions. The temple of Soloman, which was burnt on the 8th of Reptember, by the Babylonians, was a second time consumed, on the same day, and in the same month, by Trius. Timolon gained many battles on the same day of his birth. Charles V. was incessantly leaded with Portune's favours on the same day of his birth. Charles V. was incessantly leaded with Portune's favours on the same day of his birth. Charles V. was incessantly leaded with Portune's favours on the same day of St. Mathias. Henry III. on the day of St. Mathias. Henry III. On the day of St. Mathias. Henry III. On the day of St. Mathias. Henry III. Sing if Regiand, on Saturdays, It is well known, the colocked up to by the world as the 14th of May was the day always fatal in the Pentecost; Sextus V. on Weilnesdays; Louis XIII. on Fridays; and Henry VII. King is England, on Saturdays. It is well known, that the 14th of May was the day always fatal in the life of Henry IV.

But those different examples prove of themselves that the influence of days contribute nothing to good or had fortune, since they are lucky to some and the reverse to others.

It would, moreover, be easy to show, that the same day may bring very different events. Pompey was assassinated in Egypt on the very day that he had formerly triumphed over Pompey was assassinated in Egypt on the very day that he had formerly triumphed over the pirates and Mithridates; and Leo X. was consecrated with great pomp on the very day on which he had been made prisoner the year before. Aiexander the Great was very far the properties of the supportitions notions of

before. A icasuler the Great was very far from partaking of the superstitious notions of some of his captains. Never, mid they, did the kings of Macedon open a campaign in the month of June.—They were right, replied Alexander: sherefore I command that the month of June he called the 2d month of May. In this age, the Lith of the month and the Fridsy of every week, are still regarded as days of bad omen. And this prepossession, contrary to good sense and reason, is not confined to the lower class of people. More than one man of rack yields to its influence; and I know even some men of intellect who believe in good and bad days. All this preves that errors only change their name by being perpetuated.

In the first volume of Dr. Godman's Natural History, recently published by Mesers. Carey & Lea, the historian thus appropriately introduces the subject of the Dog :

Were we desired to propose a creature fit to be an emblem of incorruptible fidelity, unwanting friendship, forbearing and enduring affection, combined with all that renders gravalue, we know not one more worthy to be distinguished than the Dog, which, under all distinguished than the Log, which, under all circumstances of adverse or prosperous fortune, addices with untiring and zealous vigilance to the cause of his master, being ever ready to lay down his own life in defence of him he has chosen to serve and obey. Without the co-operation of this highly gifted quadruped, how could man have opposed the maxious animals by which his path was beach, or his dwelling surrounded? In those decays or his dwelling surrounded? In those dreary regions of the earth, where the face of nature wears a veil of almost purpetual gloom, and the wretched wanderers of the human family are forced to maintain a perpetual struggle against the combined severities of cold and famine, how much more abjectly miseratel would their condition be, had not nature endowed this animal with the disposition to seek the society of man, despite of all the the injuries inflicted through his barbarity and

surerings included through his barbarity and all the injuries inflicted through his barbarity and neglect.

We have to regret, however, that the good mankind derives from the services of this animal, is closely connected with the possibility of receiving from it the most terrible of evils, as if nature could not operate without balancing or antagonizing every thing by its opposite. It is the dog kind that, from time to time, inflicts on our race a malady, perhaps the most agonizing and horrific to which humanity is liable, from whose aspect or endurance the stoutest hearts, and best regulated minds shrink away in terror. Against this dreadful disease the sources of medicine have hitherto proved inadequate and unavailing, and though we continue to hope that the augmentation of power, which medicine is daily acquiring through the seal of its cultivators, may ultimately triumph over this afflicting disorder, experience traches us how much cause there is to fear that many must still neglish heaves a reader son to fourth or the found. cause there is to fear that many must still perish before a remedy can be found.

MIND AND MANNERS

There seems to be some congeniality be-tween a fine form and a virtuous mind. When we meet an individual in the walks of life who unites pleasing manners with beauty of per-son, there is none that can withhold from him the meed of approbation. But if on a further the meed of approbation. But if on a further acquaintance we discover that his principles are unsound, his feelings perverted, and his habits so many hypocritical assumptions, we are compelled to turn ourselves away in disgust. It is like the traveller who copies afar off a pleasant grove of orange trees, quivering in the western breeze. The tinge of the fruit rivals the beams, of the rosy sun; the fruit rivals the beams, of the rosy sun; the

fragrance of the branches scents the whole atmosphere. The traveller approaches in rapture and discovers it the haunt of serpents. rapture and discovers it the haunt of serpents, wild beasts, or wilder Indians. Such too often is the result of outtrated acquaintance in the

GOOD THINGS.

It is now something like a fortnight aincome have been mousing over the newspapers in hopes of pouncing upon a saying fit to be re peated, or an idea worth remembering. But no unfortunate have we been, that till within a very few moments, all our pains-taking in-dustry hath been in vain. "But now is the winter of our discontent, made glorious sum-mer." As Spencer says,

A worthy Knight comes pricking o'er the plain, who brings with him the where-with-all to alleviste our unnatural craving, and we devo his restorative with all the secret extacy wi as restorative with all the segret extacy with which Sanoho Panza was wont to suck a raw-egg behind the door. In an original article in the last Galaxy, entitled Sibyfline Leaves, we find the following maxim, the least of which we can say, ia, that it is just as striking as it is original, and just as original as it is striking.

THE HEART.

Mr. Larrey, the well known French Sur-geon, lately presented to the Academy of Medicine in Paris, the heart of a man who, in a fit of derangement produced by gricf, stab-bed himself with a watchmaker's file. After having penetrated several inches, the instru-ment broke off level with the skin. The up happy being was conveyed to an hospital, where it was determined that no operation where it was determined that no operation could be attempted. He survived for twenty-one days, in but little pain, and without feeling any difficulty in changing his position.—On opening the body, it was seen with surprise that the file had not only pierced the pericarlium, and one of the coats of the heart, but that, entering that overan at three inches but that, entering that organ at three inches from the point, it had passed obliquely, from the left to the right, and from the lower to the higher part; crossing the left cavity, the middle membrane and the right cavity;

REQUITED LOVE.

What words can be more delightful to the human ear, than the unexpected effusions of generosity and affection from a beloved wogenerosity and affection from a beloved wo-man. A gentleman, after great misfortunes, came to a lady he had long courted, and told her his circumstances were so reduced that he was actually in want of five guineas. "I som very glad to hear it," said she—"Is this your affection for me!" he replied, in a tone of despondency, "why are you glad?" "Be-cause," answered she, "if you want five gui-neas. I can put you in possession of five thouneas, I can put you in possession of five the

SUN-RISE OF THE SOUL

There is a land where strength decays, Where wisdom comes to nought; Where vice claims virtue's honest praise— Where love with gold is bought.

There is a land where genius dies, Where seience meets its doors— Where all that's great, or good, or wise, Sinks in oblivion's gloon.

There is a land whereon the brave Do perish in their fame— Sink silently within the grave, Retaining but a name,

There is a land where beauty fades. Upon its iny breast; Where penury the heart pervades, And pain's a constant guest.

And there's a world where love and truth Perennial rise and bloom; Where virtue, in unfading youth, Shall triumph o'er the tomb.

How gladly would my tortured breast Reject earth's base control; Reject earth's base control;
And hail afag, in regions blest,
The sun-rise of the soul! BOSTON BARD
